EDUCATION

University of Illinois Urbana-Champaign, MS (Thesis track), Computer Science

Urbana, IL

Advisor: Prof. Saurabh Gupta; research in **robotics**

Aug. 2025 – May. 2027

- Coursework: Statistical RL Theory (A+), Advanced NLP (A), Deep Generative Models*, Computer Vision*

Indian Institute of Technology Bombay, B.Tech (with Honors), Computer Science

Mumbai, India

GPA: **9.86/10**, ranked **3/194** overall; minors in **machine intelligence** and **mathematics**

Nov. 2021 – May. 2025

- Selected coursework: RL, Robotics, Stat learning, Kernel methods, Formal methods for ML, Crypto, Advanced compilers, Discrete Math/Algo/Automata, Arch/Net/OS/DB/Compilers, Real/Complex/Fourier analysis, Linear/Abstract algebra

RESEARCH EXPERIENCE

Sim2real Dextrous Manipulation | Guide: Prof. Saurabh Gupta

Aug. 2025 – present, **UIUC**

- Working on sim2real transfer for **bimanual dextrous** manipulation tasks focusing on generalization to novel environments
- Techniques unite ideas from abstract scene **representation**, model distillation & RL **exploration** with few demonstrations

Sycophancy in multi-agent systems [†] | Guide: Prof. Dilek Hakkani-Tür

Aug. 2025 – Dec. 2025, **UIUC**

- Quantitative evaluation of sycophantic behavior of a hierarchy of **cooperative multi-agent** systems across various tasks
- Designed novel pipeline using evaluated sycophancies to mitigate sycophantic behavior & improve accuracy of the system

Towards proving the Neural Feature Ansatz | Guide: Prof. Parthe Pandit

Jun. 2025 – present, **IIT Bombay**

- Working to prove the **Deep Neural Feature Ansatz** for the cosine kernel; provably affords **fast neural feature learning**
- Proofs involve the use of neural tangent kernels, infinite matrix theory, some Fourier and functional analysis

Lower bounds on testing 3-colorability [†] | Guide: Prof. Akash Kumar

Jan. 2024 – Apr. 2024, **IIT Bombay**

- Established **optimal** linear lower bound for one-sided 3-colorability testing on $(1/3 - \epsilon)$ -far vs colorable expander graphs
- Studied various **lower bound constructions** in an attempt to prove two-sided bound for ϵ -far vs colorable expanders

RESEARCH INTERNSHIPS

Quantum Positional Proof Systems [†] | Guide: Prof. Nick Spooner

Jun. 2024 – Sep. 2025, **EPFL**

- Formalized positional interactive proof systems; **characterized** complexity-theoretic expressivity in the classical setting
- Showed that quantum resources can improve expressivity using techniques from nonlocal games & **no-signaling theory**
- Proved that surprisingly, XOR soundness anti-concentrates on parallel-repetition of the monogamy-of-entanglement game[†]

RL for quantum state preparation [†] | Guide: Prof. Vikas Garg

Jun. 2023 – Sep. 2024, **Aalto University**

- Improved the quantum state preparation pipeline with an RL agent capable of constructing 9-qubit stabilizer states **zero-shot** ($\sim 4 \times 10^{16}$ states in total) while being **30%** more efficient than baselines; exploration solved via novel dense reward
- **Proved** that this efficiency is guaranteed for **at least 95%** of states despite seeing only **10^{-8}** of all states during training

ACADEMIC EXPERIENCE

- *Preparing arbitrary stabilizer states via disentangling and path-aware reinforcement learning* [†]
K. Agaram, S. Midha, A. Müller and V. Garg. Accepted to **QIP 2025** and **ML4PS@NeurIPS 2025**

Nov. 2025

- Selected to be a **Google DeepMind** pre-doctoral researcher (declined for MS at UIUC)

Apr. 2025

- *Quantum state preparation with reinforcement learning, oral* [🔗] at the **APS Global Physics Summit 2025**

Mar. 2025

- Invited to and participated in the Cornell-Maryland-Max Planck Pre-doctoral Research School, Saarbrücken

Aug. 2024

OTHER PROJECTS

Mobile Robot Localization [🔗] | Guide: Prof. Leena Vachhani

Oct. 2024 – Nov. 2024, **final project: Robotics**

- Wrote a ROS package for mobile robot navigation using **MoCap+trilateration** with Kalman filtering to offset sensor noise

Video Style Transfer [🔗] | Guide: Prof. Preethi Jyothi

Aug. 2023 – Nov. 2023, **final project: ML**

- Implemented style transfer for videos, preserving style of moving objects across frames via occlusion-aware **optical flow**

SCHOLASTIC ACHIEVEMENTS

- Received the **Institute Academic Prize** given to the **top 1%** of students for stellar academic record
- Placed **1st, 2nd, 2nd** in India and **8th** (thrice) overall at the **Simon Marais Mathematics Competition**
- Secured All India Rank **40** in **JEE Advanced** and 122 in JEE Main among 140K+ and 1M+ aspirants respectively
- Among the **top 35** students (**twice**) invited to the **International Mathematics Olympiad Training Camp**
- Qualified for the International Olympiad on Astronomy and Astrophysics Team Selection Camp (IOAA OCSC)
- Conferred with the prestigious **KVPY** (All India Rank 23) and **NTSE** (ranked 2nd in Stage 1) scholarships

2022, 2024

2022, 2023, 2024

2021

2020, 2021

2020

2019, 2020

TECHNICAL SKILLS

Languages | Python, C/C++, Java, x86 assembly, SQL, bash, MATLAB, Javascript, \LaTeX

Frameworks | PyTorch, TensorFlow, ROS, NVIDIA IsaacGym, OpenAI Gym, NumPy, Pandas, et al., IBM Qiskit, Manim

[†] Preprint available upon request. * Ongoing.
